Power Driven Engineering – Ryan Huff

Power and Analog Electronics Consultation

How I can Help You:

- Innovative solutions to your vexing electronics problems
- Strategic, business-first thinker
- Design, prototyping, validation, simulation, layout, and test
- Independent design reviews
- Generation and review of datasheets, articles, and sales and marketing collateral

Companies I Have Helped:

- Linear Technology
- Analog Devices
- Coilcraft
- Nishati Solar
- Northrop Grumman / TRW

Rates:

- Free initial consultation
- Fixed-price bids
- Swap-for-services / barter
- \$150/hour

Skills I Possess:

- Power electronics design
 - Isolated power supplies
 - Non-isolated supplies
 - Battery chargers
 - Solar controllers
 - LED drivers
 - EMI/EMC design and testing
 - Power architecture / topology analysis
- Analog electronics design
 - Power-over-Ethernet
 - Photonics drivers
 - Filtering
- Magnetics design
 - Transformers / inductors
- Communicating complex ideas
